

Red Team Alliance's Five-Day Surveillance Dynamics

From law enforcement to physical penetration testing, being able to perform physical surveillance is an essential component of any successful operation. This intensive five-day course is designed to take green surveillants and give them the skills necessary to start working in the sphere of surveillance. This class is designed with extreme emphasis on progressive practical exercises to build competence. The first two days focus on technical surveillance skills where students can expect to greatly increase their camera craft.

The next three days focus on traditional surveillance tradecraft as they apply the content they learned the previous days and layering in new skills during practical application exercises and skill building drills. Students will work during day and night hours and will be pitted against role players both unskilled and skilled in counter-surveillance.
