

Red Team Alliance (RTA) has technicians on staff who have dedicated considerable time and effort to researching and analyzing the Primus line of mechanical lock products from the Schlage corporation. This 1-day master class is a compendium of this knowledge and will afford students the means to extract key information about target facilities and ultimately provide them avenues for gaining unauthorized entry into spaces which are protected by one of the most popular high security lock solutions in North America.

This class is an intense specialization focus and is recommended only for students who already have experience with conventional pin tumbler lock systems and have a foundation in the principles of Covert Methods of Entry. If you have any
